

RIGHT NOW IS THE TIME FOR CAUTIONS

Before Summer Arrives We Should Lay Our Plans to Prevent Typhoid Ills.

HEALTH BOARD STRONGER

Inspectors Are Making Regular Tours to See That Public Is Guarded.

By Dr. A. R. LEWIS.

Provision was made by the recent legislature for a considerable increase in the inspecting force of the state health department, as well as for the extension of public health work in other directions. Preparations are being made so that within a short time Oklahoma will have one of the most thorough and effective systems of food, drug and general sanitary inspection of any state. It must be remembered that the most successful work of a state health department lies in the prevention of disease. It is of course of far greater benefit to the public to prevent disease than to fight it after it is under way, yet because such work is lacking in the spectacular element it often does not attract the attention of the public.

Inspection Is Continuous.
Inspectors of the state health department are constantly on the move, inspecting restaurants, drug stores, groceries, hotels, rooming houses, depots and other places where the conduct of business may have a direct influence upon the health of the people. All complaints are promptly investigated, but much the larger and more important portion of the work of the health inspectors is done quite independently of complaints. They ascertain conditions on their own account and if they are such as to harm the health of the public take prompt action to see that they are remedied. This continual inspection also has a deterring influence upon such persons as might be careless—the knowledge that an inspector is liable at any minute to enter his store or restaurant tends to induce the proprietor to keep it up to the standard.

Precautions Against Typhoid.
As the summer draws near both communities in individuals should pay heed to the prevention of typhoid. For there is scarcely a disease which is so great an extent absolutely preventable as typhoid. Vaccination against typhoid will tremendously reduce the chances of any individual taking this always serious and often fatal disease. In addition to vaccination, precautions should be taken to see that conditions which will cause typhoid are eliminated. This applies especially to water supplies. Typhoid infection may be conveyed in other ways, but as a matter of fact a very large proportion of all typhoid cases are due to infection conveyed through water.

Some cities, like Los Angeles and New York, are able to draw their water supplies from sources in far away mountains which are comparatively pure. Most communities, however, are not situated so that this is possible. They must draw their supply from streams flowing through more or less thickly settled territory. Such a source is of course liable to contamination. Fortunately great progress has been made in recent years in the development of chemical processes whereby it is possible to destroy the greater proportion of the disease-bearing germs in water and make it safe to drink. Most towns and cities in Oklahoma are equipped with a more or less efficient plant for such a purpose. Investigation by the state board of health has shown, however, that in some cases such plants are not adequate, in others they are not kept up to the standard. It is important that public opinion should be aroused on this subject. To equip and maintain such plants is a matter of small expense—it is a tremendous factor in the health of the community.

CATARRHAL DEAFNESS MAY BE OVERCOME

If you have Catarrhal Deafness or head and ear noises are growing hard of hearing, go to your druggist and get 1 ounce of Earsol (double strength), and add to it 1/2 pint of hot water and a little granulated sugar. Take 1 tablespoonful four times a day.

CORNS PEEL OFF PAINLESSLY

There's Only One Genuine Corn-Peel—That's "Gels-It"

There's only one happy way to get rid of any corn or callus, and that's the painless-peel-off way. "Gels-It" is the only corn remedy in the world that does it that way—effectively, thoroughly. Why get down on the floor, tie yourself up into a knot, and have to fiddle with "peel-it" plasters, greasy ointments that rub off, sticky tape, and digging knives and scissors, when you can peel off your corn or callus in one complete piece, painlessly and surely, with magic simple easy "Gels-It"? It takes 3 or 4 seconds to apply "Gels-It"; you use 2 or 3 drops, and that's all. "Gels-It" does the work. Get rid of that corn at once, so that you can work and play without corn torture. Be sure to use "Gels-It"; it never fails.

"Gels-It" the guaranteed, money-back, corn-remover, the only sure way to get rid of a corn at any drug store. Mfgd by E. Lawrence & Co., Chicago, Ill.

"3 drops of 'Gels-It'—Corn is doomed." The world that does it that way—effectively, thoroughly. Why get down on the floor, tie yourself up into a knot, and have to fiddle with "peel-it" plasters, greasy ointments that rub off, sticky tape, and digging knives and scissors, when you can peel off your corn or callus in one complete piece, painlessly and surely, with magic simple easy "Gels-It"? It takes 3 or 4 seconds to apply "Gels-It"; you use 2 or 3 drops, and that's all. "Gels-It" does the work. Get rid of that corn at once, so that you can work and play without corn torture. Be sure to use "Gels-It"; it never fails.

Aviator's Family Waits Air Trip

Mrs. Harry Hawker and Baby Hawker, photographed at their home, Surbiton, England.

Mrs. Harry Hawker, wife of the English aviator, doesn't seem to be fearful of her husband's chances for success in his attempt to be the first man to pilot an airplane across the Atlantic ocean. At least the photo doesn't show it. Hawker is now in Newfoundland waiting for favorable weather. His wife and their little daughter are at the Hawker home in Surbiton, England.

CHICAGO KEPT QUIET BY RAIN AND POLICE

Score of Arrests Made and Revolutionary Outbreaks Are Kept Well Under Control.

CHICAGO, May 1.—A score of arrests were made in the May day demonstrations of radicals in Chicago today. An all-day rain, and police activity had the effect of quenching any revolutionary fires that may have been struggling for expression. The day's developments were as follows: Mounted policemen charged and dispersed a crowd of socialists who attempted to march to a hall. They were allowed to hold a meeting. Two policemen were attacked by members of a crowd outside a hall where radicals were holding a meeting and a near riot resulted. Sixteen men and one woman were arrested. Red flags appeared on two elevated railway stations, on flagpoles in two parks, and on a technical college building. They were removed. Handbills printed in red ink and bearing among other inscriptions the words, "Walk today, fellow workers, under the red flag of revolution," appeared in small numbers in several sections of the city.

Philip J. Barry, chief of the local bureau of investigation of the department of justice, received a letter signed "committee of the bolshevik party," threatening, "you will get the same as the Russian czar."

Mr. Barry didn't take it seriously. Officials of the newly formed labor party called a meeting and issued a statement that an attempt to discredit labor and radicalism had been made, and the recently discovered plot to kill government officials and prominent citizens by bombs sent through the mail was "a plan by hirelings of Wall street."

John Fitzpatrick, president of the Chicago Federation of Labor, declared his organization had not received one report of a union man falling in to go to work.

Very choice VAN DYCK CIGAR

FOUR SELECT SIZES
We suggest Staples: 2 for 25c

Observe the sleek, well-laid wrapper on Van Dyck. It shows in part the very choice quality.

PURITAN OIL COOK STOVES

"YOU can always leave the Puritan while the pot is boiling"—the flame stays where you set the indicator on the burner—low, medium or high. And at full heat the indicator's automatic wick stop prevents smoking."

From Puritan advertising—The Delineator—May, 1919.

Steady cooking heat—not a sweltering fire, for you set the utensil in a clean hot flame that comes up through the grate—like gas. Keeps the kitchen clean and cool. Brass burners—last for years.

Reversible Glass Oil Reservoir

A clean, quick way to handle the ideal cooking fuel—kerosene oil.

Puritan stoves are sold by reliable dealers everywhere. Look for the Triangle trade mark.

See your dealer or write for free Puritan booklet No. 24.

THE CLEVELAND METAL PRODUCTS CO.

7810 Platt Avenue Cleveland, Ohio

DEALERS NOTE:
The Magnolia Petroleum Company is the distributor of these products in your locality. Complete stocks are carried by them at conveniently located points.

Ask Your Neighbor About Shannon's

We have just closed the largest month in the history of our ever-growing business

"THERE'S A REASON" Ask Your Neighbor

We get real joy out of trying to treat you so well that you always want to come back and send your neighbor, whether to buy or just visit.

Why It's a Mistake to Delay Your purchase of a NEW EDISON

Most everything you buy wears out eventually. An automobile, for example—or a suit of clothes. So the longer you delay its purchase the longer you'll have it to enjoy.

Not so with a New Edison. It will outlive you anyway. Every month you delay is just one more month gone from your life—another month in which you might have had your life enriched by music—but didn't.

Under our new plan by which payment can be made so much a month there's no reason why you shouldn't be enjoying your New Edison right now.

The New Edison cost \$3,000,000 to perfect. It is the only instrument which successfully meets the test of direct comparison with the living artist's voice or instrument. It will bring into your home the world's best music, sung or played by the world's great artists.

Call tomorrow for a demonstration. "Send it out to the house" will be your verdict.

No needles to change—plays all disc records.

Instruments range in price from—

\$41 to \$285
